

Dear FCC Commissioners & Staff:

Please consider a nation where every home has the choice to get broadband at a reasonable rate. Where each person can chose from a variety of providers that offer many different services to suit their needs.

This will never happen if we continue to pass regulations that protect a few monopolies and leave mom and pop ISPs unable to compete. We will end up with just a few big players that will jack their prices and refuse to provide in areas where it will not benefit the central company.

Community ISPs are a valuable asset to many towns & should be able to compete on a level playing field as phone companies. They have interests to stay and provide in these towns since they live there & want to help their friends and families succeed.

Please think of information for all and not for just the wealthy in larger communities.

Sincerley,

Ruth Meers

Sincerely,

Ruth Meers
